iOS Developer

Senior iOS Developer with 15+ years of experience in architecting, developing, and deploying high-performance mobile applications across consumer, enterprise, and B2B environments using Swift, SwiftUI, Objective-C, and modern Apple frameworks. Proven expertise in leading full mobile software development lifecycles, integrating RESTful APIs, cloud services, CI/CD pipelines, and scalable backend systems while delivering intuitive user experiences and commercially successful App Store products. Strategic technical consultant, partnering with cross-functional global teams to modernize legacy applications, optimize mobile architecture, accelerate product delivery, and implement data-driven mobile solutions for business growth and operational efficiency.

Core Competencies

Apple Devices, Languages, Frameworks & Tools: iOS, iPadOS, macOS, watchOS, tvOS, Swift, SwiftUI, Objective-C, Core Data, Swift Data, Markdown, XCTest, Unit Testing, UI Testing, Xcode, TestFlight, Swift Package Manager, UIKit, PhotosUI, VisionKit, CloudKit, PDFKit, StoreKit, GameKit, App Store, EventKit, WeatherKit, MapKit, CoreLocation, AudioToolbox, AVFoundation, Charts, Combine, MessageUI, Observation, Core Image, Network, UserNotifications, Storyboards, FileManager, AppStorage, Attributed Strings

Additional Languages: SQL, PHP, JSON, HTML

Methodologies: Agile, Scrum, Continuous Integration/Continuous Deployment (CI/CD), Test Driven Development (TDD), CLEAN

SDKs & RESTful API Integration: Instagram, Facebook, GRDB, Google Maps, Google AdMob, Stripe, TaxJar, MailChimp, ZipArchive, Moltin E-commerce, Shippo, CodeScanner, TPPDF

Tools: GitHub, Pixelmator, Program AI, PHPMyAdmin, Slack, Trello, Air Table, Monday, Cocoa Pods, MeisterTask

Professional Experience

iOS Developer | Creative App Solutions, LLC, Huntington, NY & Jacksonville, FL | 2021 to 2026

- Led cross-functional teams of up to 60, delivering high-quality applications for global clients (North America, Europe, and Australia).
- Built and deployed iOS apps and achieved commercial success for ~75% of authored apps.
- Consulted for global brands, including Disney Interactive.
- Led Agile workflows using CI/CD, GitHub Actions, and TestFlight pipelines.
- Delivered multilingual apps with localization across 50+ languages, optimizing user experience for global mobile applications.

Ballistic Tracker Project

- Managed GitHub Actions workflows for version control and releases.
- Built SwiftUI/UIKit UI with physics-based analytics and visualization.
- Integrated real-time APIs, location data, and SQL reporting exports.

SquareFrame Project

- Developed scalable Swift architecture using MVC and Xcode standards.
- Improved retention by 35% and revenue by 51% via UI and backend overhaul.
- Built a RESTful backend using PHP, MySQL, and JSON services.
- Automated order flow, invoicing, and product customization systems.

VendManage Project

- Built Apple Watch inventory system, improving restock efficiency.
- Created analytics dashboards with SQL-driven product visualization.
- Optimized logistics using GIS routing and delivery planning tools.

iOS Developer | DVMagic Studios, Inc., Remote | 2010 to 2021

- Led SDLC for consumer and enterprise mobile applications distributed via App Store and private enterprise channels.
- Migrated legacy Objective-C apps to Swift and SwiftUI, modernizing legacy applications to improve performance.
- Applied Xcode development best practices and iOS SDK frameworks to streamline workflows and support scalability.
- Leveraged GitHub workflows, SQLite, SwiftData, GRDB, and MySQL RESTful APIs for structured data management and integration.

Expense 2 Go Project

- Built an enterprise travel and expense management platform with secure onboarding workflows.
- Cut reimbursement time by 80% and manual processing overhead by 15% for 10K+ global users via VisionKit implementation.
- Applied CoreImage, automated Accounts Payable systems, and 128-bit encryption protocols to optimize data security.

My Footy Stats Project

- Built a suite of sports analytics apps for the Australian Football League (AFL), reaching #2 App Store ranking in Australia.
- Championed platform modernization by migrating legacy UI to SwiftUI to improve usability.
- Integrated PDFKit and CoreImage to support sharing across social media apps with monetization features.

Stats Tracker Project

- Built a full-stack sports analytics system for scheduling and performance tracking in minor-league Australian Football.
- Delivered automated reports using CoreLocation and weather-based insights while enabling iOS sharing.

VendManage Project

- Developed and launched rapid MVPs and prototypes for enterprise product validation, leveraging Agile methodologies.
- Created gamified demo apps using GameKit for stakeholder engagement.

Education & Certifications

Bachelors of Science (BS) in Computer Science | Grumman Data Systems Institute, Woodbury, NY
